# Mohammed Wisam

## Web Developer

Greetings, I'm Mohammed Wisam, a versatile professional primarily focusing on full-stack web development and UI design. I am a continuous learner who never settles and always seeks new technologies and skills to enhance my digital products. My journey into the world of coding and web development began in 2019, and since then, I've honed my skills in web development, I'm passionate about transforming ideas into digital realities, creating seamless user experiences, and pushing the boundaries of technology.

# Experience

## Dec 2023 - Jan 2024

Digital Logic I Baghdad, Iraq

### Front-end Web Developer (on-site)

- Developed a Vue 3 component library with TypeScript and generic components, enhancing developer productivity and code maintainability.
- Launched a new project by implementing foundational CRUD pages, user roles management, and intuitive navigation flows.

## May 2023 - Jul 2023

Alkafeel Information Technology Center I Karbala, Iraq

### Full-stack Web Developer (on-site)

- Engineered a modular Nuxt 3 system with independently configurable sub-projects, maximizing project flexibility and customization.
- Built a robust, user-friendly multi-step form featuring animated transitions, browser-side image caching, and Web Crypto API-powered data encryption for enhanced security and resilience.

## Jan 2023 - Apr 2023

MetaluxTech I Iraq

### Full-stack Web Developer (remote)

- Developed an image converter leveraging ImageMagick for robust image manipulation capabilities, streamlining image processing tasks.
- Automated build and release processes using GitHub Actions, creating a CI/CD pipeline for Windows and Linux deployment, ensuring efficiency and cross-platform compatibility.

## Jan 2022 - Jan 2023

Speetu I Amsterdam, Netherlands

### Head of Front end development (remote)

- Modernized a Nuxt 2 application by migrating to Nuxt 3 and integrating TypeScript for improved maintainability and type safety.
- Automated build and deploy the Nuxt 3 app on a Linux server.
- Created a drag-and-drop video annotation tool for product and moment tagging within a browser-based player.

## Jan 2019 - Jan 2022

Turtanu I Amsterdam, Netherlands

### Front-end Web Developer (remote)

- Developed a coding e-learning platform.
- Built several landing pages.
